SUPPORT

Dear Valued Supporters:

We are excited to announce the details for The Bee Foundation For Brain Aneurysm Prevention's 2025 HoneyBash Gala taking place on Saturday, October 18th at the Union League of Philadelphia. This iconic event brings together key leaders in the Brain Aneurysm field, corporate sponsors and benefactors, awareness advocates, survivors and their families. All of whom are dedicated to ending the devastation caused by this disease. Each year we strive to make the HoneyBash Gala impactful, and entertaining. This year, the Union League serves as the backdrop as we share cocktails, fine food and an opportunity to take home some incredible auction items! We will celebrate the great advancements in Research, Awareness, Advocacy and Support with an award ceremony honoring the TBF Preventative Research Grants & The Bee Hope Award.

This year the 2025 Gala is dedicated to the development of brain aneurysm best practices in the areas of identification, treatment & recovery. We will honor the advancements that have taken place in each of these areas and identify the opportunities for improvement that will lead to greater public awareness and more lives saved. All proceeds will support the TBF Best Practices Program and the Emergency Education Fund supporting the education of health care professionals in the early identification of brain aneurysms.

Come witness the strength of the TBF Community — where courage begins with using our own voices to advocate for ourselves, our families, and our community. Together, we are building a lasting legacy of hope.

We Invite You To Support the HoneyBash Gala in any of the ways below:

1. Be a Sponsor and receive great visibility as well as HoneyBash Tickets
2. Attend the gala or purchase a table and bring your family & friends
3. Donate an item to our Live or Silent Auction

Thank you once again for your support and consideration. We hope to see you on October 18th for a memorable evening in honor of those who have suffered from this deadly disease.

Sincerely,
Erin Kreszl & Christine Kondra
Co-Founders

Increased research & awareness is critical to preventing this drastically underfunded deadly disease.
